Dear researchers,

## **About this update: GenTeam is celebrating its tenth anniversary!**

On January 10, 2010, GenTeam went online with approximately 1.3 million entries (index of Roman Catholic marriages of Vienna, several indices for Lower Austria, owners of building plots in Lower Austria, Gazetteer for Austria, Bohemia, Moravia and Slovenia). Since then, more than 19 million entries have been added. The database has thus grown to more than **20.4 million** records. I would like to sincerely thank everyone who contributed to this project!

**The number of registered and active users has also continually increased and has now reached 50,000. They all benefit from free access to all data without having to pay any membership fees.**

### **Gazetteer: Austria, Slovakia, Czech Republic, Slovenia, South Tyrol**

Thanks to the great work of Mag. Ingrid Schuster, approximately 4,500 locations for today's Slovakia as well as Ruthenia were added to the GenTeam Gazetteer in November 2019. This database now comprises more than 76,000 locations in Austria, the Czech Republic, Slovakia, South Tyrol and Slovenia with information on the respective Roman Catholic parish, any previous parishes, the year the registers begin, as well as the respective archive.

Just like with all other GenTeam databases, the Gazetteer allows to enter parts of a name. The **autocomplete** function is therefore an easy solution to solving the problems of variations in orthography!

## **Details on this update**

## **1 Military – Austro-Hungarian casualty lists of World War I: Already approximately 1.9 million records online!**

The casualty lists enumerate the wounded and killed soldiers as well as the prisoners of war of all crown lands of the Habsburg monarchy. In their entirety, these lists will hold approximately 3 to 3.5 million names. They include officers and one-year volunteers as well as subordinated military personnel of all denominations, including Jewish, Muslim and Protestant soldiers.

Besides many partial and complete lists, approximately 210 additional lists are currently in progress.

Several contributors to this project prefer to remain unnamed. I would therefore like to sincerely thank all those who have been working on this important database, all those who are already working on further lists, as well as Frank Raschka for managing this project.

I cordially invite you to participate in this fascinating project. If you are interested please contact the project manager Frank Raschka at [verlustliste@gmail.com](mailto:verlustliste@gmail.com) or [kontakt@GenTeam.at](mailto:kontakt@GenTeam.at). We will then send you a sample entry table and assign you a list number.

## **2 Diocese of Passau: Already 4.4 million records online**

The overall number of approximately 4.4 million records from the Diocese of Passau comprises about 440,000 marriages (complete) and about 2.07 million baptisms. The remaining records are burials.

This database contains information on the parish, volume, page, last name, first name(s) and date/year. In some cases, the occupation and the address/town are also indicated. You can access the church records of the Diocese of Passau at [www.matricula-online.eu](http://www.matricula-online.eu).
